Stack

- **FastAPI** 0.115+ (async, OpenAPI docs auto-generated)
- **SQLAlchemy 2.0** (async, type-safe ORM)
- **Alembic** (migrations)
- **PostgreSQL 16** (production DB)
- **Redis** (rate limiting, sessions)
- **Stripe** (subscriptions, checkout, customer portal)
- **JWT** (access + refresh tokens, secure rotation)
- **Resend** (transactional emails)
- **Docker** (multi-stage, <100MB image)
- **Pytest** (async tests with fixtures)

Features Out of the Box

- ☐ Auth: register, login, JWT refresh, password reset via email
- ☐ Multi-tenant ready: user scoping on all queries
- ☐ Stripe subscriptions: checkout session, webhook handling, plan management
- ☐ Rate limiting middleware
- ☐ CORS configured for SPA frontends
- ☐ Soft delete on all models
- ☐ Health check endpoint
- ☐ Alembic migrations auto-configured
- ☐ Docker + docker-compose for local dev
- ☐ Makefile with common commands
- ☐ .env.example with all required vars documented
- ☐ Tests with 80%+ coverage baseline

Quickstart

```
cp .env.example .env # Fill in your keys
make dev             # Starts Postgres + Redis + app with hot reload
make migrate         # Run migrations
# Visit http://localhost:8000/docs for interactive API docs
```
