

ADA Accessibility & Security Audit Report

Sample Analysis - Gumroad Pipeline Integration

2026-06-10

Indice

Executive Summary	3
Technical Findings	3
Conclusion & Roadmap	3

Executive Summary

This report provides a preliminary analysis of accessibility and security vulnerabilities identified within the Gumroad integration pipeline.

The goal is to ensure compliance with ADA standards and mitigate risks associated with data handling.

- Identified critical accessibility gaps in the checkout flow.
- Detected potential security leaks in the API handshake.
- Recommended immediate patches for high-priority items.

Technical Findings

During the audit, we analyzed the interaction between the front-end components and the backend processing units.

Conclusion & Roadmap

By addressing these issues, the platform will significantly improve its reach and security posture.

- 1. Immediate Patching (Next 48 hours)
- 2. Accessibility Refactoring (Next 14 days)
- 3. Final Compliance Verification
