

FastAPI SaaS Starter Kit – Updated

Launch your SaaS in days, not months.

A complete, production-ready starter kit built with FastAPI, PostgreSQL, Docker, CI/CD, and Stripe integration. Perfect for solo founders, freelancers, or agencies looking to ship a high-performance SaaS product quickly.

Features

- **FastAPI + Pydantic** – clean, type-safe APIs.
- **Docker Compose** – one-click local dev and production deployment.
- **Stripe Payments** – ready-to-use subscription handling.
- **Authentication** – JWT + OAuth2.
- **CI/CD** – GitHub Actions pipeline with tests and linting.
- **Scalable PostgreSQL** – async support with SQLAlchemy.
- **Admin Dashboard** – pre-built UI with Tailwind CSS.

Who is it for?

- Freelance developers building client projects.
- Solo founders launching a SaaS MVP.
- Agencies needing a repeatable backend scaffold.

Pricing

- **\$25** – full source, docs, and 30-day email support.

Why choose this kit?

- **Speed** – get a functional SaaS up in < 48 h.
- **Quality** – production-grade code, tests, and CI.
- **Support** – I'll answer questions for a month.

Demo

[Live demo](https://example.com/demo) – try the admin panel and checkout flow.
